

**CALL FOR PAPERS**  
Third International Conference on  
**Formal Structures for Computation and Deduction (FSCD 2019)**  
*24 – 30 June 2019, Dortmund, Germany*

**PROGRAM COMMITTEE CHAIR**

H. Geuvers           Radboud U. Nijmegen  
fscd2019@easychair.org

**PROGRAM COMMITTEE**

Z. Ariola           U. of Oregon  
M. Ayala Rincon   Universidade de Brasilia  
A. Bauer           U. of Ljubljana  
F. Bonchi          U. of Pisa  
S. Broda           U. of Porto  
U. Dal Lago        U. di Bologna & INRIA  
U. De'Liguoro     U. of Torino  
K. Deepak          U. of New Mexico  
P. Dybjer          Chalmers U. of Technology  
M. Fernandez     Kings College London  
J. Giesl           RWTH Aachen  
N. Hirokawa       JAIST  
S. Lucas           U. Politecnica de Valencia  
A. Middeldorp    U. of Innsbruck  
F. Pfenning       Carnegie Mellon U.  
B. Pientka         McGill U.  
J. van de Pol      U. of Twente  
F. van Raamsdonk  VU Amsterdam  
C. Schürmann     ITU Copenhagen  
P. Severi          U. of Leicester  
A. Silva           U. College London  
S. Staton          Oxford U.  
T. Streicher      TU Darmstadt  
A. Stump          U. of Iowa  
N. Tabareau       INRIA  
S. Tison           U. of Lille  
A. Tiu             Australian National U.  
T. Tsukada        U. of Tokyo  
J. Urban          CIIRC Prague  
P. Urzyczyn       U. of Warsaw  
J. Waldmann      Leipzig U. of Applied Sciences

FSCD (<http://fscd-conference.org/>) covers all aspects of formal structures for computation and deduction from theoretical foundations to applications. Building on two communities, RTA (Rewriting Techniques and Applications) and TLCA (Typed Lambda Calculi and Applications), FSCD embraces their core topics and broadens their scope to closely related areas in logics, proof theory, new emerging models of computation (e.g. homotopy type theory or quantum computing), semantics and verification in new challenging areas (e.g. blockchain protocols or deep learning algorithms).

Suggested, but not exclusive, list of topics for submission are:

1. Calculi:   • Lambda calculus • Concurrent calculi • Logics  
              • Rewriting systems • Proof theory • Type theory • Homotopy  
              Type theory • Logical frameworks • Quantum computing
2. Methods in Computation and Deduction: • Type systems • In-  
duction and coinduction • Matching, unification, completion,  
and orderings • Strategies • Tree automata • Model checking  
              • Proof search and theorem proving • Constraint solving and  
              decision procedures
3. Semantics:   • Operational semantics • Abstract machines  
              • Game Semantics • Domain theory and categorical models  
              • Quantitative models
4. Algorithmic Analysis and Transformations of Formal Systems:  
              • Type Inference and type checking • Abstract Interpretation  
              • Complexity analysis and implicit computational complexity  
              • Checking termination, confluence, derivational complexity  
              and related properties • Symbolic computation
5. Tools and Applications: • Programming and proof environ-  
ments • Verification tools • Libraries for proof assistants and  
interactive theorem provers • Case studies in proof assistants  
and interactive theorem provers, ...
6. Semantics and verification in new challenging areas : • Certi-  
fication • Security • Blockchain software • Data bases • Deep  
learning algorithms • Planning, ...

**CONFERENCE AND WORKSHOP CHAIR**

Jakob Rehof           TU Dortmund

**PUBLICITY CHAIR**

Sandra Alves           Porto U.

**PUBLICATION** The proceedings will be published as an electronic volume in the Leibniz International Proceedings in Informatics (LIPIcs) of Schloss Dagstuhl. All LIPIcs proceedings are open access.

**SUBMISSION GUIDELINES** Submissions can be made in two categories. Regular research papers are limited to 15 pages and must present original research which is unpublished and not submitted elsewhere. System descriptions are limited to 6 pages (excluding references) and must present new software tools in which FSCD topics play an important role, or significantly new versions of such tools. Submissions must be formatted using the LIPIcs style files and submitted via EasyChair. Complete instructions on submitting a paper can be found on the conference web site.

**IMPORTANT DATES** All deadlines are midnight anywhere-on-earth (AoE); late submissions will not be considered.

<b>Titles and Short Abstracts:</b>	3 January 2019	<b>Authors Notification:</b>	22 March 2019
<b>Full Papers:</b>	10 January 2019	<b>Final version for proceedings:</b>	22 April 2019
<b>Rebuttal period:</b>	11–15 March 2019		

**BEST PAPER AWARD BY JUNIOR RESEARCHERS** The program committee will consider declaring this award to a paper in which at least one author is a junior researcher, i.e. either a student or whose PhD award date is less than three years from the first day of the meeting. Other authors should declare to the PC Chair that at least 50% of contribution is made by the junior researcher(s).

**SPECIAL ISSUE** Authors of selected papers will be invited to submit an extended version for a special issue of Logical Methods in Computer Science.

**FSCD STEERING COMMITTEE** T. Altenkirch (Nottingham U.), S. Alves (Porto U.), M. Fernández (King's College London), C. Fuhs (Birkbeck, London U.), D. Kesner (Paris U.), N. Kobayashi (U. Tokyo), D. Miller (Inria), L. Ong (Chair, Oxford U.), B. Pientka (McGill U.), S. Staton (Oxford U.), R. Thiemann (Innsbruck U.).
